

CLAIM AMENDMENTS:

Claim 1 (Currently Amended): A buckle-phone coupled with a belt, comprising:

a mobile phone bent in a ~~the~~ length direction of the belt to correspond to a user's waist size;

a mobile phone support bent to correspond to the mobile phone and including a mobile phone accommodating section for attachably and detachably supporting the mobile phone, a ~~the~~ side of the mobile phone being coupled with a ~~front~~ ~~the~~ side of the mobile phone support ~~belt~~;

an earphone assembly electrically connected to the mobile phone installed in the mobile phone support, and including an earphones, a microphone, and an earphone wire connected with the mobile phone support, the earphones, and the microphone, the earphone assembly including:

an earphone main body installed with the earphone; and

a microphone installing section installed with the microphone
and extendably coupled with the earphone main body;

an earphone accommodating section provided at the mobile phone support and accommodating the earphone assembly including the earphone main body and the microphone installing section, the earphone accommodating section comprising an elastic reel for winding the earphone wire to be elastically withdrawn; and

a buckle provided at the rear ~~other~~ side of the mobile phone support and being adapted to be coupled with the ~~other side of the~~ belt so as to adjust the belt length to correspond to the user's waist size;

a signal terminal provided at the mobile phone for making contact with the mobile phone support so as to enable communication;

at least one terminal contact protrusion which protrudes from the mobile phone accommodating section so as to make contact with the signal terminal, and being connected with the earphone assembly, the mobile phone being usable to communicate both when it is removed from the mobile phone support, and while it is retained in the mobile phone support by using the earphone assembly; and

an elastic member coupled to the terminal contact protrusion and enabling the terminal contact protrusion to elastically push out against the signal terminal;

hook coupling sections provided at sides of the mobile phone; and

hooks provided at the mobile phone accommodating section and being coupled with and released from the hook coupling sections.

Claims 2-5 (Canceled).
